

Laboratory Safety Orientation Checklist

Laboratory Safety Training Review by Lab Training Manager (PI or Designee)

The Principal Investigator (PI) may authorize a Lab Training Manager designee, but it still is the PI's responsibility to ensure all lab personnel have the necessary skills (through training and experience), maturity, and supervision to work safely in a lab with hazardous processes or substances. Consider varying maturity and experience levels when orienting researchers and deciding appropriate assignments, supervision, and required training. When considering non-matriculating personnel under the age of 18, see Harvard's [minors in labs policy](#).

- Add researcher to lab training roster in [PeopleSoft](#).
Review the person's research program and identify core and specialized training requirements. Show them how to access the [Harvard Training Portal](#).
 - Offer an exception to those working under direct supervision in a lab for less than a week and/or not working with or adjacent to hazardous materials, processes, or equipment.
- Review lab-specific safety training/SOPs for hazardous chemicals, materials, equipment, or processes related to the individual's research program, including Committee on Microbiological Safety (COMS) protocols, radiation registrations, carcinogens, lab documents, etc.

Lab Orientation

Review these resources:

- [Lab Emergency Response Guide](#) and [emergency phone numbers](#) locations
- Emergency power off switches, room purge buttons, and fume hood purge buttons (where applicable)
- Emergency evacuation routes and [meeting points](#)
- Fire extinguisher and the closest fire alarm pull station locations
- Safety shower and eyewash station locations and proper use
- Safety data sheets (SDS) (in-lab location or [online](#))
- Chemical Hygiene Plan (in-lab location or [online](#))
- [Safe chemical work practices](#)
- [Injury/illness report filing process](#)
- [PPE policy](#), lab's [PPE assessment report](#), and required PPE location (gloves, safety glasses, lab coats, etc.)
