FIRE PREVENTION

The best way to prevent fire is to minimize its potential through the observation of safe work practices and housekeeping.

You should observe the following basic rules:

☑ Keep storage areas neat and clean.
☑ Avoid accumulating excessive paper products.
☑ Do not store combustible items such as paper and cardboard against electrical panels, in telephone closets, stairwells, and corridors.
☑ Do not store flammable or combustible fluids or gases without permission from the building manager.
☑ Keep lunch rooms and kitchens clean.
☑ Maintain electrical appliances in good working order. Periodically check for potential electrical hazards such as frayed cords, broken plugs and overloaded electrical outlets. Avoid using extension cords.
☑ Make sure all electrical appliances and cords are approved by the Underwriters Laboratory (UL).
☑ Do not block or hamper passageways or exit doors.
☑ Refrain from stacking items too high or close to the ceiling where they may hamper the operation of sprinkler devices. Nothing should be hung from sprinkler heads or sprinkler piping.
