Protect Yourself & Others!

Help prevent the spread of the common cold, flu, and other illnesses.

• **Cover** your nose and mouth with a tissue when you cough or sneeze. After, throw the tissue in the trash.

  - If there is no tissue, cough or sneeze into the crook of your elbow.

• **Wash** hands often with soap & water* especially before leaving a restroom.

  - Always wash hands before eating or touching your eyes, nose, or mouth.

• **Avoid** close contact with sick people and stay home when you’re sick!

* Hand washing with soap & water is best. When not available, hand sanitizer may be used.
