If You Discover a Fire

**RELOCATE** - If safe to do so, relocate people in immediate danger. Be aware of persons who may need assistance.

**ALARM** - Pull the building fire alarm to alert others.

**CONFINE** - Close all doors as you exit your office.

**EVACUATE** - Evacuate the building. **Do not use elevators.**

Call **5-5560** from a safe location outside the building to provide information to the University’s Operations Center. **Report to your designated meeting site.**
The best way to prevent fire is to minimize its potential through the observation of safe work practices and housekeeping. You should observe the following basic rules:

- Do not block or obstruct exit passageways or exit doors.
- Keep storage areas neat and clean.
- Avoid accumulating excessive paper products.
- Do not store combustible items such as paper and cardboard against electrical panels, in telephone closets, stairwells, and corridors.
- Do not store flammable or combustible fluids or gases without permission from the building manager.
- Maintain electrical appliances in good working order. Periodically check for potential electrical hazards such as frayed cords, broken plugs and overloaded electrical outlets. Avoid using extension cords.
- Make sure all electrical appliances and cords are approved by the Underwriters Laboratory (UL).
- Refrain from stacking items too high or close to the ceiling where they may impede the proper operation of sprinkler devices. Nothing should be hung from sprinkler pipes or sprinkler heads.
- Do not use space heaters. These units are a major cause of fires and their use is not authorized in most buildings.
- Use timers to automatically shut off coffee makers.
- Keep lunch rooms and kitchens clean.
