Cleaning up after rodents

Rodent droppings present

Few and scattered

- Floor or non-food storage areas
- Normal cleaning methods

Food storage & handling areas (cold/hot rooms, counters, equipment)

- Standard cleaning & sanitizing

Dense

- Contact FMO or trained individual to disinfect and clean area
- Spray the area with OxivirTB or 10% bleach and wait 5 minutes.
- Wear disposable gloves, and clean area with a disposable towel.
- Do not create dusts.
- If a vacuum is used, it should be a HEPA-filtered unit. Direct the exhaust away from the area being cleaned.

For additional guidance, please refer to the resource from the CDC or reach out to EH&S.
