Cleaning up after rodents

Rodent droppings present

- Few and scattered
  - Floor or non-food storage areas
    - Normal cleaning methods
  - Food storage & handling areas (cold/hot rooms, counters, equipment)
    - Standard cleaning & sanitizing
- Dense
  - Contact FMO or trained individual to disinfect and clean area
    - Spray the area with OxivirTB or 10% bleach and wait 5 minutes.
    - Wear disposable gloves, and clean area with a disposable towel.
    - Do not create dusts.
    - If a vacuum is used, it should be a HEPA-filtered unit. Direct the exhaust away from the area being cleaned.

For additional guidance, please refer to the resource from the CDC or reach out to EH&S
